August, 2018

INTRODUCTION:

Delivering effective service delivery requires multi-facet approaches and entails translating ideas, manifestos and aspiration into plans. Plans translate goals and objectives into provision of goods and services and societal development through budgets implementation. Among the prerequisite for achieving societal development a long, medium and short term plans were develop.

In the spirit of open governance, co-creation and effort towards institutionalization of participatory budgeting processes at all starter of government to support participatory budget Project Monitoring Partnership (PMP) a Coalition of Civil Society Organizations Working on Policies, Programmes and budgetary processes in Jigawa state coordinate and facilitates the collection of citizens demand in all the 30 constituencies of the state, with support from about 100CBOs covering 538 communities reaching out 24870 respondents comprising 11,060 Adult (Men and Women) , 11,060 youth (Male and Female) and 2,770 People with Disabilities and compiled citizens' inputs for 2019 budget preparation and implementation.

We equally appreciate the government toward tilting to citizens' centered budget; this can be ascertained in the previous year's budget, where 21% of the capital budget amounting to 19,003,000,000 was reflected.

METHODOLOGY

The following methods were adopted for generating and Sharing of the citizens' inputs to 2018 budget;

- Updating of the tool.
- Mapping out legislatives' aids from 30 constituencies
- Involvement of Emirate based CBOs
- Involvement of PMP local chapter

- One day training on generating citizens inputs at three (4) Emirates districts
- Collection and collation of inputs generated from 538 communities across the state
- Six (6) days Analysis based on prioritized and utmost needs of the citizens
- Analysis was categorized by constituencies and sectors
- Shared the analyzed citizens inputs with relevant MDAs HoA members and NASS members as it's relate to them.
- Radio phone-in program to sensitize general public on citizens' inputs into budget
- Development of infor-graphs and share on different social media platforms

Processes

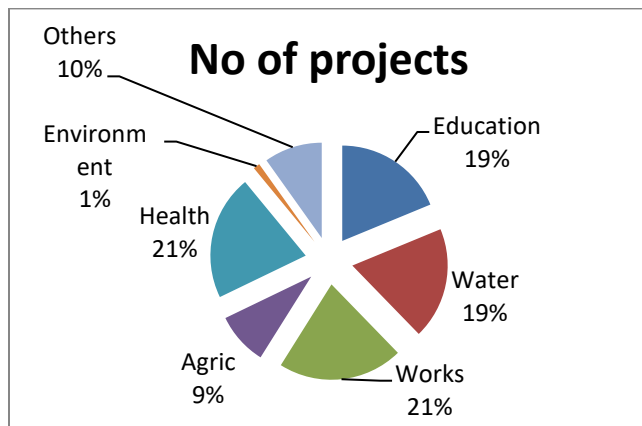

About 100 Community based organizations participated in this years' exercise using the modified tool. The CBOs assigned their members to communities where not less than 45 people were reached in villages, 65 in rural communities and 100 in urban areas across different class of citizens (Adult (Men and Women), youth (Male and Female) and People with Disabilities)

Objectives:

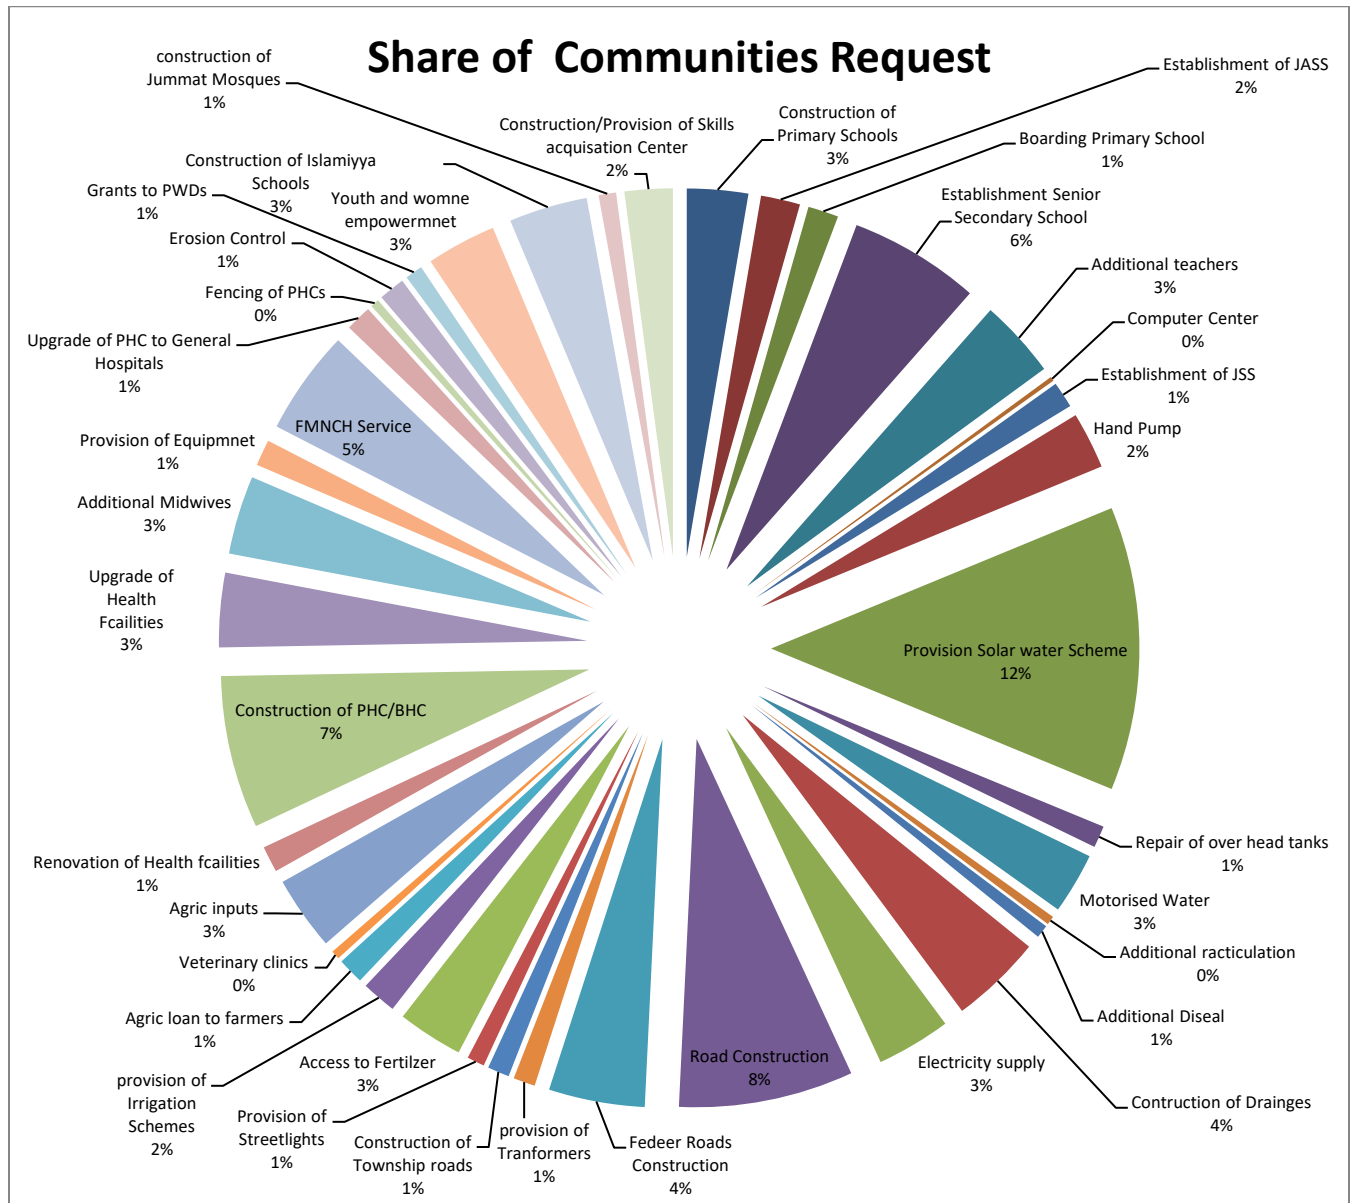

1. To generate citizens' inputs into 2019 budgets
2. To prioritize citizens' demand using simple research techniques
3. To classify the inputs by constituencies, and sectors
4. To improve citizens' participation in budgets process
5. To strengthen citizens' ownership

Major Findings:

Distribution by Sectors

| Sector | No of projects |
|-------------|----------------|
| Education | 101 |
| Water | 102 |
| Works | 114 |
| Agriculture | 48 |
| Health | 114 |
| Environment | 6 |
| Others | 53 |

| S//N | Name of MDAs | Projects | Number of Communities Request | % |
